# About Matrix

Established nearly a decade ago, Matrix is now recognised as the UK's leading steam cleaning machine manufacturer with an extensive portfolio of high quality light commercial to industrial 4.5 bar and 8 bar cleaning systems.

With our head office based in Lancashire and a network of over 100 carefully selected trade dealers, we are able to provide a full nationwide distribution service for our steam clean machines supported by a thorough maintenance service and extensive availability of spare parts.

## Medical Division

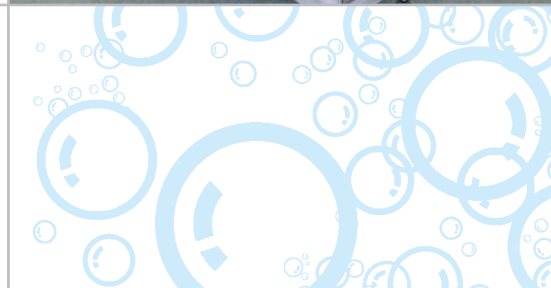

Following in-depth consultation with the NHS, the MD8000 and MD4500 steam clean machines have been designed in such a way that they not only meet but exceed the requirements of the NHS with regard to deep clean sanitising. They are compact, easily transportable and manoeuvrable and are so durable that they can be used consistently. The products are both patient and operator friendly, quiet, compact and manoeuvrable. One of the excellent features of the machines is that they can be used daily without interrupting or delaying other cleaning processes.

Matrix professional steam cleaning systems, designed by professionals for cleaning professionals, working in the medical sector.

Matrix steam cleaners have been proven to remove Salmonella, Listeria, Monocytogenes, Staph Aureus, MRSA, Saccharomyces, Carevisae, Bacillus Cereus, TVC 37, TVC 22 and Clostridium Difficile by greater than 99.9% and the results are available on request in our microbiologists report.

# MD8000

4.5  
Bar

## Steam - Detergent - Vacuum

The MD4500 is a 4.5 bar medical steam cleaning machine which just like the MD8000 has been designed and built specifically for the health industry. The MD4500 is an ideal machine where the operating conditions are not as demanding as those requiring the MD8000. The MD4500 is also made from powder coated Zintec steel and is durable, lightweight and compact. Surfaces are left dry after cleaning thanks to the machines integral vacuum system and it has also been certified in removing many super bugs including MRSA. This machine is supplied with a complete set of accessories.
