

Quattro Range

About Matrix

Established nearly a decade ago, Matrix is now recognised as the UK's leading steam cleaning machine manufacturer with an extensive portfolio of high quality light commercial to industrial 4.5 bar and 8 bar cleaning systems.

With our head office based in Lancashire and a network of over 100 carefully selected trade dealers, we are able to provide a full nationwide distribution service for our steam clean machines supported by a thorough maintenance service and extensive availability of spare parts.

Quattro Range

The Quattro range has been designed by Matrix to offer the high quality expected from all our commercial steam cleaners, with a small number of features, not always required by our customers, removed. The result being a range of steam cleaners that is our best value yet and significantly lower cost than the market rival.

Our full range of steam cleaning machines can be found in almost every town and city providing reliable and thorough commercial cleaning solutions. Our machines are very durable, well built and extensively tested to make sure they operate at their optimum efficiency for long periods of time. This reliability has made them a firm choice for end users and cleaning contractors and we now have a network of over 100 qualified dealers happy to be associated with the Matrix commercial cleaning range.

The Quattro Range has been developed to satisfy the bulk buying market and key accounts where volume purchases require lower unit costs and specific features are not always required. This focus has ensured that no other range of steam cleaning machines on the market provides the same fantastic value as the Quattro.

Quattro Features

All machines in the Quattro range are manufactured from Zintec steel and are powder coated. The machines are provided in orange as standard but for orders over 25 units, the machines can be supplied in any colour to match a customers branding or corporate colours. The controls are simple to use and all the machines are easy to operate and have been described as very user friendly. The reduction in a number of features compared to the commercial range results in less maintenance requirements especially for the larger Quattro Plus machine. Each Quattro machine delivers 8 bar of operating pressure, comes with a 5 litre water capacity and will run continuously.

Quattro Mini

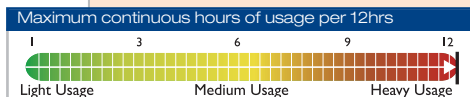

Steam

The Quattro Mini is the smallest machine in the Quattro range. It still delivers an impressive 8 bar of cleaning pressure but is a steam only machine without the drying facility of a vacuum system. This machine is the ideal choice for lighter commercial use where value for money combined with performance is the most important feature. Like the other Quattro's, it also features a continuous fill boiler system for maximum usage and minimum stoppage time.

Accessories Included

- 4 metre steam only hose
- 2 x extension tubes
- Long nozzle
- Curved nozzle
- Detail brush nozzle
- 3 x round nylon brushes
- 3 x round brass brushes
- 55mm round brush

Quattro Midi

Steam - Detergent

The Quattro Midi is an 8 bar pressure steam generator with an integral chemical delivery system designed primarily for the removal of chewing gum, featuring a continuous fill boiler system. This machine is ideally suited for chewing gum removal in shopping centres, sports stadiums and local authority concerns and industrial applications where the use of detergent is required.

It is light, easy to manoeuvre and easy to use and is excellent value compared to comparable steam and detergent systems on the market. Just like all other products in the Quattro range, the Midi is made from Zintec steel and is powder coated.

Accessories Included

- 4 metre steam only hose
- 2 x extension tubes
- Long nozzle
- Curved nozzle
- Detail brush nozzle
- 3 x round nylon brushes
- 3 x round brass brushes
- 55mm round brush

Quattro Maxi

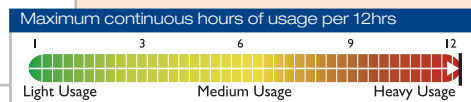

Steam - Vacuum

The Quattro Maxi is a commercial/industrial 8 bar pressure steam cleaning machine is made from a powder coated, corrosion resistant Zintec steel, featuring a continuous fill boiler system allowing refill at any time during operation. In addition to the production and supply of high temperature steam, which penetrates deep into surfaces sanitising and killing bacteria in a wide variety of commercial environments, the integral vacuum ensures surfaces are left clean & dry.

Accessories Included

- 2.5 metre steam
- Vacuum & detergent hose
- 2 x extension tubes
- 300mm floor brush nozzle
- 300mm squeegee insert
- 3 x round brass brushes
- 150mm steam & vacuum nozzle
- 150mm steam & vacuum brush
- 150mm steam & vacuum squeegee
- 3 x round nylon brushes
- Crevice tool
- Short steam lance
- Service kit

Quattro Plus

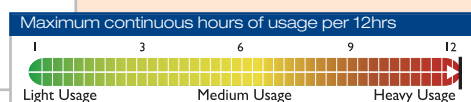

Steam - Detergent - Vacuum

The Quattro Plus is a commercial/industrial 8 bar pressure, steam cleaning machine incorporating a chemical delivery system. The machine has a simple one switch operation and is made from a powder coated Zintec steel as opposed to stainless steel, featuring a continuous fill boiler system and comes complete with an integral vacuum system. High temperature steam penetrates deep into surfaces sanitising and killing bacteria in a wide variety of commercial environments and the integral vacuum ensures surfaces are left clean & dry.

Accessories Included

- 2.5 metre steam
- Vacuum & detergent hose
- 2 x extension tubes
- 300mm floor brush nozzle
- 3 x round nylon brushes
- 3 x round brass brushes
- 150mm steam & vacuum nozzle
- 150mm steam & vacuum brush
- 300mm squeegee insert
- 150mm steam & vacuum squeegee
- Crevice tool & short steam lance
- Service kit.
